ROBOTICS ENGINEERING

NEW BOOK SERIES

CALL FOR BOOKS

Invitation to Qualified Authors and Book Editors to Submit Proposals of Books and Book Chapters

Robotics engineering is one of the most fascinating engineering fields in the 21st century, allowing improvement in virtually all areas of human life. Cutting-edge designs of mobile and industrial robots, soft robots, biorobots and molecular robots, etc., combines the complementarity of the anthropomorphic and biomorphic concepts in robotics, autonomous and artificial intelligence-based perception and action, miniaturization of robotic devices and penetration into micro- and nano-space.

THE NEW ROBOTICS ENGINEERING BOOK SERIES WILL

- Enhance the development of innovative academic engineering curriculums and inspire new R&D directions
- Establish a continuous, consecutive and successive learning environment at various levels of the engineering society
- Facilitate professional development in advanced technologies and bring more students, engineers and faculties to robotics engineering

SERIES SCOPE AND PURPOSE

The series covers conceptually new and emerging methodologies and technologies in macro-, micro-, and nano-scale robots and robotic systems; open-architecture systems; systems with components of different physics domains such as mechanical, electrical and electronics; biologically-inspired systems and chemical processes; and robot-human interaction. Applications include, but are not limited to:

- Industrial Robots
- Mobile Robots
- Medical and Bio-Medical Robotic Devices, and other Biorobots
- Service Assistant Robots
- Educational and Entertainment Robots

For submission guidelines, please contact the series editor.

EDITOR, ASME PRESS ROBOTICS ENGINEERING BOOK SERIES

Vladimir V. Vantsevich, Ph.D., Sc.D., ASME Fellow, Professor and Director, Vehicle and Robotics Engineering Laboratory, University of Alabama at Birmingham, vantsevi@uab.edu

ADVISORY GROUP MEMBERS

N. Aspragathos, University of Patras
M. Ceccarelli, Cassino University, Italy
K. Deng, Jilin University
A. Eskandarian, Virginia Tech.
Q. Ge, Stony Brook University
K. Goldberg, University of California at Berkeley
D. Hrovat, Ford Motor Company
H. Kazerooni, University of California at Berkeley
S. Kim, Massachusetts Institute of Technology
V. Krovi, Clemson University
P. Larochelle, South Dakota School of Mines and Technology
D. Margolis, University of California at Davis
M. McCarthy, University of California at Irvine
E. Messina, National Institute of Standards and Technology
R. Norton, Worcester Polytechnic Institute
V. Portman, Ben-Gurion University of the Negev
L. Qiao, 3M Corporate Research Laboratory
B. Ravani, University of California at Davis
M. Shoham, Technion – Israel Institute of Technology
D. Tesar, University of Texas at Austin
D. Thomas, U.S. Army TARDEC
D. Tilbury, University of Michigan, Ann Arbor
S. Velinsky, University of California at Davis
D. Wang, Nanyang Technological University
